PROFESSIONAL SUMMARY

Technical Support Engineer with 7+ years in technology across software, travel operations, and financial services. Experienced in diagnosing hardware, software, website, access, and workflow issues; reproducing and documenting defects; maintaining WordPress and HTML/CSS websites; and coordinating clear resolutions between users, clients, and technical teams. Supported hardware and software across 50+ workstations and created practical troubleshooting documentation. Open to Technical Support and remote opportunities.

WORK EXPERIENCE

Technical Support Engineer

May 2025 — Present

Bit Apps

- Maintain client websites using HTML, CSS, and WordPress.
- Reproduce, document, and report software defects for development review.
- Create troubleshooting guides and reusable support notes.
- Coordinate technical communication between clients and internal teams.

Senior Executive

January 2020 — April 2025

Kurnia Holiday Travels

- Managed IT infrastructure, hardware installation, and software maintenance across departments.
- Analyzed operational data for promotion and budget decisions.
- Coordinated workplace technology needs across departments.

Junior IT Officer

January 2019 — December 2019

Century Securities Limited

- Provided technical support and data management in a time-sensitive stock-exchange environment.
- Installed and maintained hardware and software across 50+ workstations.
- Performed routine checks and responded to reported workstation issues.
