PROFESSIONAL SUMMARY

Technical Support Engineer and Web Developer with a B.Sc. in Computer Science Engineering and experience across the travel, stock exchange, and software sectors. Skilled in full-stack web application development with Node.js, Express, and MySQL — from database schema design and REST APIs to JWT authentication and role-based dashboards. Adept at IT support, hardware/software troubleshooting, technical documentation, and clear cross-functional communication.

WORK EXPERIENCE

Technical Support Engineer — May 2025 — Present

Bit Apps

- Maintain and enhance client websites using HTML, CSS, and WordPress.
- Identify, document, and report software bugs to streamline the development workflow.
- Authored comprehensive troubleshooting guides that improved support team response times.
- Bridge technical communication between cross-functional teams and external clients.

Senior Executive — Jan 2020 — Apr 2025

Kurnia Holiday Travels

- Managed IT infrastructure, hardware installation, and software maintenance across departments.
- Analyzed operational data to optimize service promotion strategies and budget allocation.
- Ensured 24/7 system availability through proactive monitoring and cross-functional coordination.

Junior IT Officer — Jan 2019 — Dec 2019

Century Securities Limited

- Provided technical support and data management in a high-pressure stock exchange environment.
- Installed and maintained hardware and software systems across 50+ workstations.
- Facilitated cross-functional issue resolution ensuring minimal downtime during trading hours.

Web Development

HTML | CSS | JavaScript | Node.js | Express.js | MySQL | EJS | Tailwind CSS | SCSS | WordPress | REST APIs | JWT | bcrypt | express-validator | Multer | node-cron

IT & Tools

PC Troubleshooting | Hardware | Networking | Git & GitHub | Vercel | Nodemailer | Postman | Jest | Supertest | Puppeteer | Technical Documentation

KEY PROJECTS

Emergency Medicine Finder

Production-grade healthcare platform with 3 user roles (patient, medicine shop, admin), JWT authentication, 17-table MySQL relational schema, 82+ API routes, Multer file uploads, Nodemailer email verification, and parameterized SQL queries for injection prevention. Features medicine search, request workflows, pharmacy management (suppliers, purchases with batch/expiry tracking, sales with auto profit calculation, expenses, P&L reports), multi-shop stock transfers, daily automated database backups, and data export (JSON/CSV). Built with Node.js, Express, MySQL2, EJS. Comprehensive Jest + Supertest test suite.

House Shifting Service

Relocation management system supporting 3 user roles (customer, worker, admin) with MySQL relational database, JWT-based authentication, and Multer file handling. Features role-specific dashboards for managing moving requests, worker assignments, and operational oversight. Built with Node.js, Express, EJS, SCSS.

PCIU CGPA Calculator

Web-based CGPA calculator for Port City International University students. Built with Node.js, Express, and Parcel bundler, using Axios and node-html-parser for data processing. Deployed on Vercel — students input their student ID to instantly retrieve and compute academic results.

CERTIFICATIONS

IT Support Technician Level 1 & 2 — Bangladesh-Korea Technical Training Centre, Chattogram (2017)

Completed hands-on training in PC hardware troubleshooting, operating system installation and configuration, network fundamentals, peripheral device setup, and customer support best practices. Level 2 advanced into system diagnostics, software troubleshooting, and IT service management.
